

How to View JSON Files in ATT&CK Navigator

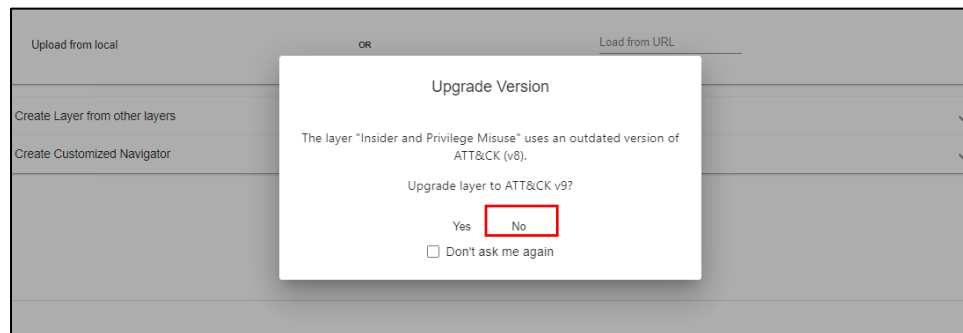

1. Download and save JSON files from WorkBench to a folder on your device.
2. Navigate to <https://mitre-attack.github.io/attack-navigator/> - This will allow you to visualize the JSON files.
3. Click on 'Open Existing Layer'. Then click on 'Upload from local'

The screenshot shows the ATT&CK Navigator interface with the following options:

- Create New Layer: Create a new empty layer
- Open Existing Layer**: Load a layer from your computer or a URL
- Upload from local**: OR Load from URL
- Create Layer from other layers: Choose layers to inherit properties from
- Create Customized Navigator: Create a hyperlink to a customized ATT&CK Navigator

4. Select the JSON file that you would like to visualize.
5. ATT&CK Navigator will ask if you would like to upgrade the layer to ATT&CK v9. You may select yes. However, note that the CIS CDM v2.0 uses v8.2 (v8) of ATT&CK and is not updated to v9. If upgrade is selected, additional ATT&CK (Sub-)Techniques will be listed that were not included in the CIS CDM v2.0 dataset. To ignore this message and proceed to ATT&CK v8, click 'No'.

The screenshot shows the ATT&CK Navigator interface with the following options:

- Upload from local: OR Load from URL
- Create Layer from other layers
- Create Customized Navigator

Upgrade Version

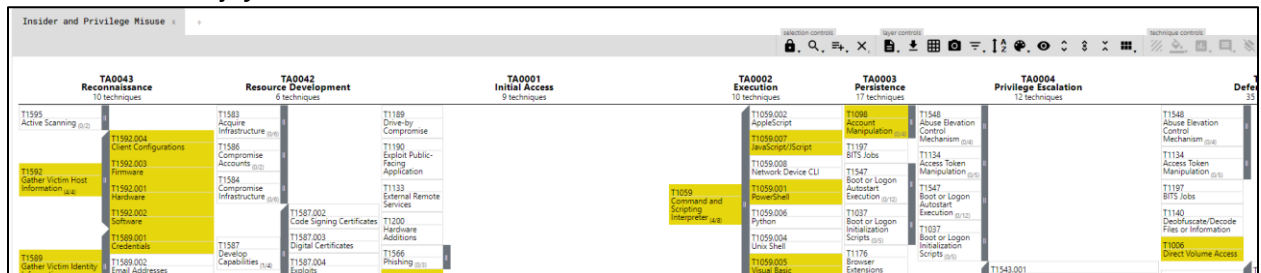

The layer "Insider and Privilege Misuse" uses an outdated version of ATT&CK (v8).

Upgrade layer to ATT&CK v9?

Yes **No**

☐ Don't ask me again

6. Visualize and enjoy!

The screenshot shows the ATT&CK Navigator interface with the 'Insider and Privilege Misuse' layer visualized. The interface displays a grid of techniques categorized by TAO (Tactical Action Object) and TA (Tactical Action).

TAO043 Reconnaissance	TAO043 Resource Development	TAO001 Initial Access	TAO002 Execution	TAO003 Persistence	TAO004 Privilege Escalation	Defenses
